

## Accessory Fitting Instructions

Thank you for choosing this Triumph genuine accessory kit. This accessory kit is the product of Triumph's use of proven engineering, exhaustive testing, and continuous striving for superior reliability, safety and performance.

Completely read all of these instructions before commencing the installation of the accessory kit in order to become thoroughly familiar with the kit's features and the installation process.

These instructions should be considered a permanent part of your accessory kit, and should remain with it even if your accessory equipped motorcycle is subsequently sold.

Restrictor Kit

## Parts supplied

1. Restricted twist grip position sensor	1 off	3. Restriction certificate (included at the end of these instructions)	1 off
2. Label (diagnostic connector cable)	1 off	4. Label (Service Record Book)	1 off

## ⚠ WARNING

Fit only genuine Triumph accessories to those models approved by Triumph as listed in the associated Triumph fitting instructions.

The accessory kits covered in this instruction are designed for use on specific models of Triumph motorcycle. The accessory kits and the models applicable are listed at the start of the instruction. They should never be fitted to any other Triumph model or to any other manufacturer's motorcycle.

Fitting an accessory kit to a Triumph model not listed, or to any other manufacturer's motorcycle, will affect the performance, stability and handling of the motorcycle.

Failure to follow the advice above may lead to loss of motorcycle control which could result in serious injury or death.

## ⚠ WARNING

Always have Triumph approved parts, accessories and conversions fitted by a competent person with the specialist knowledge and technical understanding of motorcycles, such as an authorised Triumph dealer.

The fitment of parts, accessories and conversions by a person without the specialist knowledge and technical understanding of motorcycles may affect the handling, stability or other aspects of the motorcycle's operation.

Failure to follow the advice above may lead to loss of motorcycle control which could result in serious injury or death.

## ⚠ WARNING

A torque wrench of known accurate calibration must be used when fitting this accessory kit.

Failure to tighten any of the fasteners to the correct torque specification may affect motorcycle performance, handling and stability.

Failure to follow the advice above may lead to loss of motorcycle control which could result in serious injury or death.

## ⚠ WARNING

Make sure the motorcycle is stabilised and adequately supported.

Do not support the motorcycle on any ancillary component, the exhaust system or any other non structural parts of the motorcycle frame.

A correctly supported motorcycle will help prevent it from falling.

An unstable motorcycle may fall resulting in motorcycle damage, serious injury or death.

## NOTICE

Triumph offers a broad range of approved genuine accessories for your motorcycle.

We cannot therefore cover all possible equipment variations in these instructions. For removal and installation of Triumph Genuine Accessories, always refer to the instructions supplied with the respective accessory kit.

To obtain additional copies of any Triumph accessory instructions, visit [www.triumphinstructions.com](http://www.triumphinstructions.com) or contact your authorised Triumph dealer.

## NOTICE

Before fitting this accessory kit ensure the owner of the motorcycle has been informed of the warnings contained in this instruction.

### Installation

1. Remove the passenger seat as described in the Service Manual.

## NOTICE

If M6 fixings are not supplied with this kit, retain the original handlebar end finisher fixings for reuse.

2. Remove the original twist grip position sensor as described in the Service Manual. Retain the twist grip position sensor for reuse if the motorcycle is to be returned to its original condition.

## NOTICE

The procedure to fit the restricted twist grip position sensor provided in the kit is the same as that for the original part.

## NOTICE

The rubber grip on the twist grip position sensor in the kit is interchangeable with Triumph accessory grip kits.

3. Fit the twist grip position sensor from the kit as described in the Service Manual.

## NOTICE

### Tiger 850 Sport Model Only

If heated grips are not fitted, there is no sub harness connector inside the handlebar. When fitting the twist grip position sensor the grip connector should be fitted inside the handlebar and does not require a connection.

If heated grips are fitted, there will be a sub harness connector inside the handlebar. When fitting the twist grip position sensor the grip connector should be connected to the sub harness connector and positioned inside the handlebar.

## NOTICE

### All Models

The yellow label within this accessory kit is to be attached to the diagnostic connector cable.

The white label within this accessory kit is to be attached to the Manufacturer Directed Maintenance section of the motorcycle's Service Record Book.

4. Release the diagnostic connector from its locating tang.
5. Plug the Triumph diagnostic interface directly in to the diagnostic connector and download the restricted engine calibration to the engine ECM following the procedure listed on the 'Triumphonline.net' dealer web site.
6. When the diagnostic session is completed disconnect the Triumph diagnostic interface.
7. Attach the yellow label to the diagnostic connector cable as shown below.

1. Diagnostic connector cable

2. Label

8. Refit the diagnostic connector to its locating tang.

9. Attach the white label to the Motorcycle Details and First Owner page of the Service Record Book.
10. Refit the passenger seat as described in the Service Manual.
11. Print out and complete the power restriction certificate included at the end of these instructions and hand to the owner of the motorcycle.

## Routine Maintenance (Restricted Motorcycles)

## NOTICE

Refer to the Service Record Book and confirm a restricted calibration is installed.

If unsure contact the motorcycle owner and confirm their eligibility to ride a de-restricted motorcycle.

When carrying out an Autoscan as part of the routine maintenance schedule, a restricted calibration must only be replaced by a newer version of the restricted calibration.

## De-restricting the Motorcycle

## NOTICE

Prior to de-restricting the motorcycle, it is the responsibility of the dealer to obtain proof from the rider that they are licenced to ride an unrestricted motorcycle.

12. Remove the passenger seat as described in the Service Manual.
13. Remove the restricted twist grip position sensor as described in the Service Manual. Retain the twist grip position sensor for reuse if the motorcycle is to be returned to its restricted condition.
14. Refit the original twist grip position sensor as described in the Service Manual.

## NOTICE

The yellow label is to be removed from the diagnostic connector cable.

15. Record a note on the Motorcycle Details and First Owner page of the Service Record Book in the 'Work Carried Out' column confirming the restricted calibration has been removed.
16. Release the diagnostic connector from its locating tang.
17. Plug the diagnostic interface directly in to the diagnostic connector and download the latest un-restricted engine calibration to the engine ECM following the procedure listed on the 'Triumphonline.net' dealer web site.

18. When the diagnostic session is completed disconnect the Triumph diagnostic interface.
19. Remove the yellow label from the diagnostic connector cable as shown below. Retain the yellow label to present to the owner.

1. Diagnostic connector cable

2. Label

20. Refit the diagnostic connector to its locating tang.
21. Refit the passenger seat as described in the Service Manual.
22. Inform the owner that the motorcycle has been de-restricted and the Service Record Book has been amended.
23. Present the yellow label previously removed to the owner confirming the engine calibration is set to a full power version.

### NOTICE

It is the registered keepers responsibility to ensure the vehicle registration documentation for the motorcycle is kept correctly updated, as required by the appropriate regional legislation.

Always inform the correct authorities of any change in maximum power output of the motorcycle resulting in the fitting, or removal, of the restrictor kit.

Failure to notify the appropriate authorities of any change to the power output of the motorcycle may contravene local laws in some countries and render the motorcycle illegal for road use.

### ⚠ WARNING

After fitting the accessory kit the motorcycle will exhibit new handling characteristics.

Operate the motorcycle in a safe area free from traffic to gain familiarity with any new characteristics.

Operation of the motorcycle when not familiar with any new handling characteristics may lead to loss of motorcycle control which could result in serious injury or death.

### ⚠ WARNING

If, after fitting this accessory kit, you have any doubt about the performance of any aspect of the motorcycle, contact a competent person with the specialist knowledge and technical understanding of motorcycles, such as an authorised Triumph dealer.

Riding a motorcycle when there is any doubt as to any aspect of the performance of the motorcycle may lead to loss of motorcycle control which could result in serious injury or death.

### ⚠ WARNING

Never ride an accessory-equipped motorcycle at speeds above 80 mph (130 km/h).

Remember that the 80 mph (130 km/h) limit will be reduced by the fitting of non-approved accessories, incorrect loading, worn tyres, overall motorcycle condition and poor road or weather conditions.

The presence of accessories will cause changes in the stability and handling of the motorcycle. Failure to allow for changes in motorcycle stability may lead to loss of motorcycle control which could result in serious injury or death.

### ⚠ WARNING

High-speed operation should only be attempted by riders who have been instructed in the techniques necessary for high-speed riding and are familiar with the motorcycle's characteristics in all conditions.

Only operate this Triumph motorcycle at high speed in closed-course, on-road competition or on closed-course racetracks.

High-speed operation in any other circumstances is dangerous and may lead to loss of motorcycle control which could result in serious injury or death.

---

**NOTICE**

The motorcycle must not be operated above the legal road speed limit except in closed-course conditions.
